# Genie Token on Binance Smart Chain.

Binance Smart Chain (BSC) was developed as a means of utilizing solidity-based smart contract, with much greater speed & efficiency than other competing chains. With decentralized exchanges on BSC offering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (Defi). BSC uses a token protocol developed by the Binance Team Called BEP-20.

## Advantages of the Binance Smart Chain

It's a proprietary blockchain, which will provide security and safety to all users and developers. It's native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience.

**EVM-compatible** – supports all the existing Ethereum toolings along with faster and cheaper transactions.

On-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.

## Disclaimer

Genie Token is not responsible for the actions of the Binance Smart Chain Network.
